TITLE INDEX 264

INTRODUCTION

This list represents a fully revised and updated edition of *Publications of the Canada Department of Agriculture 1867-1959,* compiled by Ella S.G. Minter. The card catalogue and the serials list of the Department's Headquarters Library provided the principal sources of information for the list, but many other sources were consulted such as various bibliographies, lists and annual reports. The list, therefore, is as complete and accurate as these sources permit. The Headquarters Library invites and would be very grateful for any corrections, additions or suggestions that would make it even more comprehensive and accurate. The list was produced for the first time with the help of computers. All information will be kept in computer storage and will be used to generate future revisions. The Department's annual *Publications* list will supplement this list until its next revision.

SCOPE

The list includes all publications, both English and French, issued by the Department from 1867 to 1973. It does **not** include, however, papers published in scientific journals, reprints, unnumbered contributions, confidential or restricted documents, unedited manuscripts or unprocessed papers.

GENERAL ARRANGEMENT

The list is divided into two separate, tumble-headed, English and French parts each of which is subdivided into three main sections.

Section I: General Departmental Publications.
Section II: Publications of Services, Branches, Divisions and other sections of the Department.
Section III: Publications of Research establishments of the Department.

Within each section the publications are generally grouped in the following order: Numbered series, Serials and periodicals, and Miscellaneous publications.
